Hi,
Does anybody know if the apu2e0 has ecc support?
I read some rumors on the web that it is not supported but I could not find the info anywhere in the official documentation.

Thanks

There're some details about ECC on apu2. I hope it'll help!

apu2e0 does not have ECC support, it i a minimalized BOM version of apu2 (only 2 NICS and 2GB no ECC DRAM). Only 4GB variants support ECC.
